

IAPPROACH WITH INTERNET DELIVERY

AVAILABLE FOR PRO AND APPRENTICE SUBSCRIBERS

About Internet Delivery

Maybe you have heard by now that you can receive your IApproach updates via the Internet instead of US Mail.

The concept is simple – IApproach is installed on your hard drive and you receive your updates through your high-speed Internet connection.

If you have access to a high-speed Internet connection, here are some reasons you should use this delivery method:

- ✓ Same great content – faster delivery. Updates are available several days before you can expect to receive a CD in the mail.
- ✓ You do not have to be connected to the Internet full time. A connection is only required just long enough to perform a 5-minute download.
- ✓ You can install and use IApproach on up to two PCs for use by the same individual (a mobile laptop and a desktop at work for example).
- ✓ You do not need to use a browser to use the program and it functions exactly like the CD version of IApproach.
- ✓ Internet Delivery features a scheduler that allows you to specify when to check for updates (i.e. every day at midnight) or you can check for updates on demand.
- ✓ The same great content is included – nothing is sacrificed when it comes to the information you have been accustomed to on your IApproach CD.
- ✓ Tdata releases updates biweekly or monthly (depending on your subscription) and you also get supplemental updates periodically as required.
- ✓ IApproach runs much smoother and faster since it runs from your hard drive.

“Internet Delivery speeds your updates several days compared to CD”

The Internet Delivery option is free to Pro and Apprentice subscribers.

You can simply download your updates instead of waiting on a CD to arrive in the mail.

Same great software – faster delivery!

Tdata's Internet Delivery

Same great software – faster delivery

This new service enables you to transfer IApproach to your hard drive and receive updates automatically using your high-speed Internet connection. It features a scheduler that allows you to specify when to check for updates (i.e. every day at midnight). This service makes updates instantaneous and eliminates waiting for CDs to arrive in the mail and best of all, there is no extra charge.

If you would like to change your IApproach subscription to arrive by Internet, please sign and fax the attached order form to us at 614.885.4342 or mail to the address below.

System requirements:

- Broadband internet connection (DSL, Cable or T1 for example)
- Windows XP, Vista or Win7 (64 bit is supported)
- 1 GB of free hard drive space
- Pentium (or equivalent) 500mhz or higher processor
- At least 1GB of RAM
- Minimum 256 color graphics card running at 16 million colors and configured for at least 800 x 600 resolution
